

SAYAN PAL

Full Stack Developer

West Bengal, India | +91 6296375183 | sayanpa514@gmail.com | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Motivated Computer Science student and self-taught full-stack developer with hands-on experience building real-world web applications. Skilled in frontend and backend development using modern JavaScript, Python/Django, and Node.js. Passionate about clean UI design, API integration, and efficient, scalable code.

EDUCATION

B.Tech, Computer Science — MAKAUT University	Expected 2027 CGPA 7.35
Class XII — Lokepara High School	2022 88.2%
Class X — Marjatpur High School	2020 86.9%

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS

Backend: Node.js, Express.js, Python, Django, Flask, REST API Design

Database: MySQL, MongoDB (Mongoose)

Tools: Git, GitHub, JWT, Vercel, GitHub Pages, Vite, GitHub Actions

Soft Skills: Self-Motivated, Problem Solving, Quick Learner, Independent Project Management

PROJECTS

InstaSnap — Instagram Media Downloader | *HTML, CSS, JavaScript, Python (Flask), Vercel*

- Built a full-stack web app that lets users download Instagram photos, videos, and carousel posts by pasting a link.
- Wrote a Python backend proxy to handle browser CORS restrictions and enable direct file downloads.
- Added real-time progress feedback, session download history (last 5 items), and dark/light mode; deployed on Vercel.

MINI YT HUB — Video Discovery & Scraper Platform | *HTML, CSS, JavaScript, Python (yt-dlp), GitHub Actions*

- Built a dark-themed video discovery platform that auto-scrapes YouTube channels by category using Python/yt-dlp.
- Implemented dynamic category filtering and instant search by title, uploader, or tag without a database.
- Automated data refresh with GitHub Actions and deployed the static frontend via GitHub Pages.

Movie Hub Live — Real-Time Movie Catalogue | *HTML, CSS, JavaScript, Node.js, Vercel*

- Developed a live movie catalogue app that fetches and displays up-to-date movie data, deployed via Vercel.
- Structured movie data in a JSON-driven architecture and used GitHub Actions for automatic catalogue refreshes.
- Focused on fast page loads and a clean browsing experience across desktop and mobile.
